A long bodied, big framed bull. If you need to add some frame to your calves, he should do the trick. We do not recommend him on heifers, but works great on cows. We used this bull heavily in '07, '08 and '09 and have since sold him. A limited amount of semen is available.

HL MISS BASIC 160M

43s covered 27 out of 29 heifers as a yearling, with 25 calving within 32 days. A very fertile, long body, calving ease bull out of the popular 20L bull. If you need an out-cross of genetics to use in the Black Hereford breed, this bull along with 781 below, have no J&N blood. His sons will work good on heifers.
